PROJECTS

Sentiment Analysis for Product Rating (07/2021 - Present)
☐ As the wave of online marketing is rising day by day. It is quite essential to provide proper discrimination between different products, to provide ease to the customer, who wants to buy the product having more authenticity. To categorize product on the basis of authenticity, there comes a concept of product rating. Product is been reviewed by customers, either in the form of ratings or feedback.

Livesketch using Python (10/2020 - 04/2021)
☐ Image processing by highlighting different layers of an image to demonstrate different properties off the image.
