SUMMARY

Full-stack engineer with strong backend expertise in building scalable APIs, microservices, and AI-integrated systems using Node.js, Python, LangChain, and cloud-native technologies. Experienced with Docker, AWS, CI/CD pipelines, and modern frontend frameworks. Strong DSA and system design foundation with 250+ problems solved. Passionate about AI-driven automation and production-grade engineering.

EDUCATION

ABES Engineering College <i>B.Tech in Computer Science Engineering (AIML)</i> Oxford Public School <i>Class XII</i> St. Joseph's School <i>Class X</i>	Ghaziabad, UP Nov. 2021 – July 2025 Gorakhpur, UP June 2018 – July 2020 Gorakhpur, UP March 2017 – May 2018
--	--

PROJECTS

- Interpre — Production-Ready Full Stack Gen AI Job Preparation Web Application** — April 2026
- from authentication and resume processing to AI-powered interview preparation.
 - Tech stacks used are-React, Node.js, JWT, Gemini AI, and Puppeteer.
 - A tool to upload resumes, analyze jobs, find skill gaps, and generate AI interview questions and ATS-ready resumes.
- Prescripto — Scalable Appointment Platform** — Link May 2025
- Built a production-ready full-stack appointment system with real-time updates and role-based dashboards.
 - Designed and optimized REST APIs in Node.js for scheduling, notifications, and concurrency-safe booking.
 - Dockerized backend services and configured CI/CD using GitHub Actions for automated deployment.
 - Deployed on AWS EC2 with S3-based storage; optimized MongoDB indexing improving response time by 35%.
- Imagify — AI Text-to-Image Generator** — Link May 2025
- Developed an AI-powered platform converting text prompts into images using LangChain pipelines.
 - Implemented secure JWT auth, user image history tracking, and responsive UI in React.js.
 - Designed scalable backend workflows for stateless image generation.
- CertifyHub — Digital Certificate Verification** — Link Sept 2023
- Developed a secure certificate verification system generating unique hash codes to prevent forgery.
 - Built reusable React components and implemented secure file-handling workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript, C/C++, SQL, Java
Backend & APIs: Node.js, Express.js, REST, Microservices
AI/ML & LLMs: LangChain, Prompt Engineering, Embeddings, AI pipelines
Frontend: React.js, Next.js, Tailwind CSS
Databases: MongoDB, PostgreSQL, MySQL
Cloud & DevOps: Docker, AWS EC2/S3, GitHub Actions CI/CD
Tools: Git, Linux, Automation

ACHIEVEMENTS

- Solved 250+ DSA problems on LeetCode, GFG, and Coding Ninjas; LeetCode peak rating: 1650.
- Winner — Internal Smart India Hackathon (130+ teams).
- Finalist — Web3 Builder Hackathon, Delhi Technical University.

CERTIFICATIONS

- CCNAv7: Introduction to Networks
- CCNAv7: Enterprise Networking, Security, and Automation
- CCNAv7: Switching, Routing, and Wireless Essentials
