PROFESSIONAL SUMMARY

Data Analyst with 3.5 years of experience in pharmaceutical analytics, specializing in SQL, Python, Power BI, and automated ETL pipelines. Skilled in forecasting, statistical modeling, and optimizing large-scale datasets to drive insights. Experienced in designing end-to-end analytical workflows and collaborating with cross-functional teams to deliver business-ready solutions. Hands-on experience building ML-driven applications, RAG-based systems, and scalable data processing modules.

TECHNICAL SKILLS

Data Analytics: SQL, Python (Pandas, NumPy, Scikit-learn), Excel, Statistical Analysis, EDA, A/B Testing
Data Engineering: ETL/ELT Pipelines, Data Modeling (Star Schema), Data Warehousing, Azure Blob Storage, Azure SQL
Visualization: Power BI, DAX, Power Query, Power BI Service
ML & Forecasting: Regression, Classification, Clustering, Time-Series Forecasting
Databases: SQL Server, MySQL
Tools & Platforms: Git, Azure Cloud, Jupyter Notebook

PROFESSIONAL EXPERIENCE

GSK Nov 2023 – Present
Engineer Bangalore

- Developed a real-time Power BI dashboard for sales and marketing teams, reducing reporting turnaround by **45%**.
- Built forecasting models using Python, improving prediction accuracy by **35%**.
- Automated **12 weekly reports**, saving **10 hours/week** using Python and SQL.
- Optimized ETL pipelines and SQL queries, increasing data processing efficiency by **30%**.
- Collaborated with cross-functional teams to convert business requirements into analytical solutions.

GSK Jul 2022 – Oct 2023
Senior Associate Engineer Bangalore

- Analyzed **20+ large-scale pharmaceutical datasets** (avg. 4GB) supporting 8 global business units.
- Migrated a major ingestion pipeline from Java to Python, reducing processing time from **45 to 30 minutes**.
- Reduced storage costs by **20%** via Azure Blob-based compression workflows.
- Developed optimized SQL stored procedures, cutting query execution time by **30%**.
- Wrote complex analytical SQL queries using joins, window functions, and aggregations to support weekly business insights.

PROJECTS

Intelligent Traffic Management System (ITMS-Lite) | Python, FastAPI, PostGIS, Scikit-learn, Time-Series Forecasting 2025

- Developed an end-to-end real-time traffic analytics system with ingestion, processing, forecasting, anomaly detection, and routing, fully running locally without cloud dependence.
- Built a Python-based ingestion pipeline to collect minute-level traffic samples, process raw JSON, and store structured data in Postgres/PostGIS.
- Engineered time-series features and trained Random Forest models to predict congestion **30 minutes in advance**.
- Implemented accident hotspot detection using **Isolation Forest + DBSCAN** to identify anomalous slowdown clusters.
- Constructed Bangalore's road graph using OSMnx and built a **FastAPI routing service** using ML-weighted travel-time edge costs.
- Created an interactive map dashboard for heatmaps, predictions, hotspots, and optimized routes.

Advanced YouTube RAG Chatbot | Python, LangChain, FAISS, Groq API, HuggingFace, Streamlit 2025

- Built a complete RAG-based conversational system using yt-dlp and youtube-transcript-api for stable YouTube data ingestion.
- Created a FAISS vector store with HuggingFace sentence-transformer embeddings for high-speed semantic retrieval.
- Integrated Groq Llama-3 API via LangChain to generate context-aware responses with source citations.
- Developed a Streamlit interface enabling transcript search, Q&A, and context expansion using Serper API.

EDUCATION

Birla Institute of Technology, Mesra Aug 2018 – May 2022
B.Tech in Computer Science; CGPA: 7.90 Ranchi, India

ACHIEVEMENTS

- Ranked among top performers on LeetCode for SQL and algorithmic problem solving.
- Recognized at GSK for improving reporting workflows and driving automation efficiency.
- Delivered multiple analytics solutions under tight deadlines, ensuring high business impact.

CERTIFICATIONS

SQL (Advanced) — HackerRank Certificate Link
